

Natasha Napier
Project Manager
Bridging the Gap Engineering

March 15th, 2019

Dr. Greg Michaelson
Principal Engineer
WV Division of Highways

Dear Dr. Michaelson,

You will find attached the finalized *Alternatives Report* prepared by Bridging the Gap Engineering for the Begley Road bridge located in Cabell County, West Virginia.

This report details the results of an examination of the three alternatives available for a 125 foot, single-span bridge. The report compares the alternatives in terms of cost, shipping restrictions, and capacity requirements, and concludes with a selected alternative accompanied by an overview of the steps that Bridging the Gap Engineering will pursue during the next phase of this design project.

Sincerely,

Natasha Napier
